---

to be on the show (Ken's surprised). Plus, get a look at the cast house! All photos from this week's issue of EW, on stands now. The homocitrulline synthetase protein CII specifically binds to the second manganese cluster of yeast cytochrome c. In order to provide genetic evidence of direct covalent interaction between the manganese clusters of cytochrome c and the enzyme which inserts the amino acid homocitrulline into the epsilon-amino group of lysyl residues, the well-known homocitrulline synthetase CII from Escherichia coli has been purified to homogeneity and the site of covalent binding between protein CII and cytochrome c has been confirmed 3e33713323
